

Narika product name:

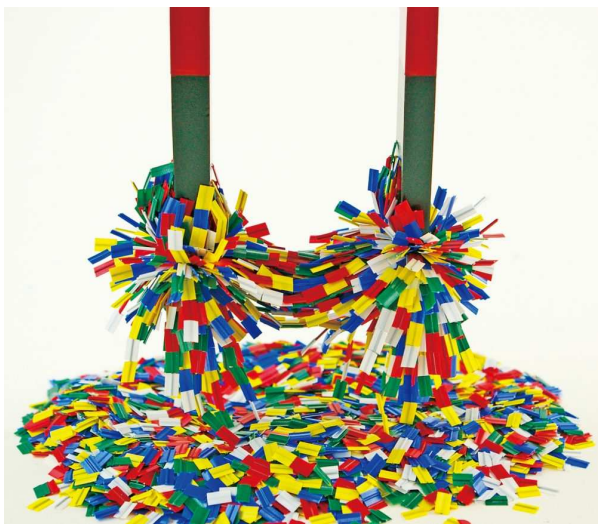

**Magnetic Line Chips - small
(5 colors)**

Product Description:

**Multi-colored Plastic-coated Iron Chips
for 3-D Magnetic Fields Observation**

Catalog Number:

B10-3723-W1

Overall advantages to users:

- Easy to visualize magnetic field.
- Colorful chips.
- Easy to cleanup tables in the laboratory.
- Safe as covered by soft plastics.

Benefits to users:

- **To all users:**
 - Dynamic changes within the 3-D magnetic field lines appear when connecting magnets in a variety of shapes.
- **To teachers:**
 - Easier to keep the laboratory clean compared with using iron fillings.
 - Easier to collect after experiments compared with iron fillings, which leads to significant cost-saving in the long term.
- **To students:**
 - Much more hands clean procedure for magnetism experiments.
 - Experiments with various types of magnets are possible because chips can easily be removed from the magnet.
