

Narika product name:

## Miniature Bulb Holder (Pack of 10pcs)

Product Description:

Miniature incandescent bulb holder fixed on a base and two terminals (connector posts) (Pack of 10pcs)

Catalog Number:

B10-6413

### *Overall advantages to users:*

- Easy to be connected with any type of electric circuit securely.
- A miniature bulb can be held stably on the base

### *Specifications*

- Size: approx. 80 x 50 x 28mm

### *Benefits to users:*

*Keywords:* Electric circuit

#### ● To all users:

- With the built-in two terminals (connector posts), not only normal (alligator) leads but also a meter (e.g. Narika's in-line type digital miniature voltmeter; A05-7065-W0) can be easily/simultaneously connected.

#### ● To teachers:

- Budget-friendly because more durable than conventional miniature bulb holder with socket and clips.
- Better storage.
- Easier equipment management.

#### ● To Students:

- Better illustrate the similarity in the image of the bulb(s) written in circuit diagrams contained in textbooks.
- Easily connect with electric circuit in accordance with the circuit diagrams thanks to the in-line type shape of the product.
- Easy to compare a diagram (on their textbook) and an actual electric circuit they build based on the diagram.
